RV College of Engineering®

*Go, change the world*

**DEPARTMENT OF**

# Computer Science and Engineering

| | | | |
|---|---|---|---|
| Date | 27th November 2024 | Maximum Marks | 60 |
| Course Code | **IS355TBD** | Duration | 100 Min |
| Sem | V Semester | CIE-I | |
| **Course : Cloud Computing- Elective (Common to CSE, CS-CD and ISE)** | | | |

**Note: Answer all five Questions**

| Sl. No. | | Part-A-Questions | M | BT | CO |
|---|---|---|---|---|---|
| 1. | a. | Illustrate the Cloud computing resource pool for an Internet based services with a neat diagram. Identify and explain any four benefits and limitations of Cloud computing. | 06 | L3 | CO1 |
| | b. | With the help of a neat diagram, explain the concept of virtualization. Also write any two differences between Cloud computing and Virtualization. | 04 | L3 | CO1 |
| 2. | a. | Draw the National Institute of Standards and Technology (NIST) Cloud model with all relevant attributes for online video streaming application. | 04 | L2 | CO2 |
| | b. | Using a Cloud service architectural system model, write any four differences between all deployment models based on number of parameters. | 06 | L2 | CO2 |
| 3. | a. | Identify and explain any four architectural standards used locally / globally with suitable examples with respect to Cloud based data capturing, processing, retrieval and storing. | 04 | L2 | CO3 |
| | b. | Draw the classified architectural diagram to support infrastructure as a service with the help of different components of cloud based service provider. Also write the functionality of each component. | 06 | L3 | CO3 |
| 4. | a. | Using a neat diagram explain the Open standards that support Identity as Service (Iaas) for cloud services. Give an example for the same. | 06 | L3 | CO3 |
| | b | Identify the cloud-based model used to meet regulatory compliance requirements by outsourcing compliance management to a third party from the cloud services. Also write any four functionalities of the same. | 04 | L2 | CO2 |
| 5 | a | Draw the cloud exploring stack architecture model for sales order processing and explain the service models used to provide different services for the customers. Also write the differences among them with service providers for each. | 6 +4 | L3 | CO4 |

| SI No. | Part-B-Quiz-II: Questions | Marks | BT | CO |
|---|---|---|---|---|
| 1 | Write the cloud based environment which provides the platform for design, development, testing and deployment. | 01 | L2 | CO2 |
| 2 | Name the Cloud deployment model it requires careful planning, security, compliance with regulations based on similar interests or goals. | 01 | L1 | CO1 |
| 3 | Identify any two virtualization platforms used to provide cloud based services to the multiple users. | 02 | L2 | CO3 |
| 4 | Draw the virtual private service partition of resources in an Iaas Cloud service. | 02 | L3 | CO3 |
| 5 | Mention the developing industry standard for authenticating end users by storing their digital identity in a common format based on the requirements. | 01 | L1 | CO1 |
| 6 | Summarize any two Cloud-based applications in an education online platform. | 01 | L2 | CO3 |
| 7 | Develop a code snippet to create a Cloud based page using HTML / CSS / XML / JavaScript. | 02 | L4 | CO4 |

**Course Outcomes:**

CO1 Understand the basics of cloud computing models and virtualization.

CO2 Analyse the issues related to the development of cloud applications.

CO3 Apply the concepts to design cloud based simple applications.

CO4 Identify solutions through cloud based software for real world case studies

| Marks Distribution | Particulars | | CO1 | CO2 | CO3 | CO4 | L1 | L2 | L3 | L4 |
|---|---|---|---|---|---|---|---|---|---|---|
| | Test | Max Marks | 12 | 15 | 21 | 12 | 02 | 22 | 34 | 02 |

**BT-Blooms Taxonomy, CO-Course Outcomes, M-Marks:**
