Go, change the world

Academic year 2024-2025 (Odd Sem)

Date	09/01/2025	Maximum Marks	10+50
Course Code	ISE355TBD	Duration	120 min
Sem	V		
UG/PG	UG	Faculty: GSM/RMP/GSN	

CLOUD COMPUTING-Elective
(Common to CS & IS)

Q. No.	Questions	M	BT	CO
	PART A			
1	List any two examples for monolithic cloud applications.	2	L2	CO2
2	Differentiate between service and data contracts with an example.	2	L2	CO3
3	Write a sample XML document structure.	2	L3	CO3
4	Name the HTTP methods that are commonly used in REST API operations.	2	L2	CO3
5	Give any two examples of PaaS platforms.	2	L1	CO2
	PART B			
1	With a real time example of a fintech application, illustrate ESB with a neat diagram for interfacing different services with an authentication module and highlight its typical features.	10	L3	CO4
2	List and explain the four levels of Internet connectivity to cloud in an organization with relevant examples of service providers.	10	L2	CO2
3	AJAX is a web application framework that has both pros and cons for cloud computing, Justify the statement with example.	10	L3	CO3
4	Compare any five features of Internet Edge and Google chrome Web Browsers.	10	L2	CO3
5	Highlight how the following standards are used in cloud computing? i.HTTP ii. JSON iii. SOAP iv. SSL v. REST	10	L2	CO3

BT-Blooms Taxonomy, CO-Course Outcomes

Marks Distribution	Particulars		CO1	CO2	CO3	CO4	L1	L2	L3	L4	L5	L6
	Test	Max Marks	-	14	36	10	2	36	22	-	-	-

Course Outcomes:

CO1:	Understand the basics of cloud computing models and virtualization.
CO2:	Analyse the issues related to the development of cloud applications.
CO3:	Apply the concepts to design cloud based simple applications.
CO4:	Identify solutions through cloud based software for real world case studies
