RV COLLEGE OF ENGINEERING®

(An Autonomous Institution Affiliated to VTU)

V Semester B. E. Regular Examinations Feb/Mar-2025

Common to ISE/CSE/CD

CLOUD COMPUTING (ELECTIVE)

Time: 03 Hours *Maximum Marks: 100*

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2 is compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8, 9 and 10.

PART-A

			M	BT	CO
1	1.1	The peak of the sum is never greater than the sum of the peaks is termed as one of the _____.	01	1	1
	1.2	Google Compute Engine is a very good example for _____ cloud.	01	1	1
	1.3	The industry creates proprietary systems with vendor lock-in, sometimes referred to as _____ clouds.	01	1	2
	1.4	$CostDATACENTER = 1n\Sigma(UnitCostDATACENTER \times (Revenue - CostDATACENTER/Utilization))SYSTEMn$, what does summation refer to ?	01	3	2
	1.5	The criteria of installing a software on a single or multiple machines is specified in _____.	01	1	2
	1.6	_____ is a low-level software that allows different operating systems to run in their own memory space and manages I/O for the _____.	02	1	2
	1.7	Illustrate the cloud computing eco-system.	01	1	3
	1.8	The fundamental unit of virtualized client in an IaaS deployment is called a _____.	01	1	3
	1.9	Microsoft Office and Adobe Photoshop are examples of _____.	01	1	2
	1.10	Define Pods and silos.	02	2	1
	1.11	Write a sample *XML* messaging document template.	02	3	2
	1.12	List all the methods used for *HTTP* protocol request and responses.	02	2	3
	1.13	Name the types of virtualization that are characteristics of cloud computing.	02	2	4
	1.14	Mention the four pillars of Microsoft Red Dog technology.	02	2	4

PART-B

2	a	Elaborate on assessing the value proposition for cloud computing.	10	2	1
	b	Explain the benefits of cloud computing.	06	2	2
3	a	Write a detailed note on virtual appliance with the help of a neat diagram and examples.	08	2	2
	b	With a neat figure explain the protocol stack of SoA.	08	2	2
		OR			

4	a	Illustrate the different ways of clients connectivity to a cloud service with an example of Chromium *OS*.	08	2	3
	b	To provide connections between a service consumer and a service provider, outline the SoA communication protocol combinations that support the cause.	08	3	3
5	a	By what means in real time scenarios, the four levels of Internet connectivity helps organizations to connect to cloud? Give any two examples of service providers for each connectivity.	08	3	2
	b	Differentiate Mozilla Firefox and Google chrome web browsers with respect to any four functionality features.	08	2	2
		OR			
6	a	"*AJAX* is a web application framework that has both pros and cons for cloud computing", Justify the statement with example.	06	3	2
	b	Highlight how the following standards are used in cloud computing: i) *HTTP* ii) *JSON* iii) *SOAP* iv) *SSL* v) *REST*	10	2	1
7	a	Enumerate in detail load balancing and virtualization in cloud with examples.	08	2	3
	b	Highlight the Round Robin load balancing policy in details.	08	2	2
		OR			
8	a	List and explain the different types of virtual machines with examples.	08	2	1
	b	Analyse relative costs and efficiencies of different physical and virtual servers of Amazon Machine Instance (*AMI*) deployment.	08	4	4
9	a	Explain how Force.com and Google support each other with tools and services?	08	2	3
	b	"Bungee Labs offer its Bungee Connect web application development and hosting platform", Justify.	08	2	4
		OR			
10	a	Write short note on Microsoft Azure.	08	2	1
	b	Justify the suitability of Google App Engine for deploying Java or Python apps on cloud with respect to payment.	08	3	4
